

SISA Information Security Specialists - Empanelled by CERT-In as a qualified IT Security auditing organisation.

Bangalore March 15, 2010

SISA has been empanelled by CERT-In as one of the few qualified IT Security Auditing organisations in the country.

SISA expertise and experience in the areas of PCI QSA Validation Services (PCI-DSS), PA-DSS Validation Services, ASV Scanning Services, Application VA and Pen Test, Forensics, Risk Management and Information Security audit has ensured its inclusion in this very select list of firms that are empanelled currently.

This Empanelment is an acknowledgment of SISA technical expertise in areas of Information Security.

CERT-In has created a panel of 'IT Security Auditors' for auditing, including vulnerability assessment and penetration testing of computer systems & networks of various organizations of the Government, critical infrastructure organizations and those in other sectors of Indian economy.

As part of its efforts to create a panel of qualified IT Security Auditing organisations, CERT-In had adopted a stringent evaluation process with a prime motive to verify and assess the technical skills and capabilities of the participating organizations to be able to perform information security audits from people, process and technology perspective.
