

Business Continuity Management Implementation Course

Implementing BS 25999

Course Description

BS 25999:2006 the Code of Practice released by BSI will be the basis for training for this workshop. Business Continuity is the need of the hour for many businesses and this workshop gives a practical implementation perspective with the opportunity to gain skills to introduce BCM into an organization. Participants will return to their organizations with the knowledge of how to implement a business continuity management system based on BS 25999.

Who should attend?

- Anyone interested in the implementation of BS 25999
- Participants involved in developing, operating, and/or maintaining business continuity systems based on BS 25999
- Professionals interested or involved with introducing BS 25999 into an organization
- Business Continuity Managers
- Business Managers
- Consultants
- Professionals involved with other management systems
- Participants required by their manager/organization to learn about implementation of a BCM.

Learning Objectives

Upon completion of this course, students should be able to:

- Articulate the requirements outlined in BS 25999-2:2007, Business Continuity Management - Part 2: Specification
- Describe and implement the 6 steps of the BCM lifecycle
- Implement a business continuity management system
- Utilize the best practice techniques contained in BS 25999-1.

Course Structure

Duration: 2 Days

Prerequisite: There are no formal prerequisites, but prior knowledge of management systems would be beneficial.

Certificates of attendance are provided at the conclusion of the course.
