

ISO 27001 ISMS Implementation Course

ISO 27001 Information Security Management System Implementation Course

Recent high profile information security breaches and the value of information are highlighting the ever-increasing need for organizations to protect their information. An Information Security Management System (ISMS) is a controlled approach to managing sensitive company information so that it remains secure. It encompasses people, processes, and Information Management Security Systems.

The objective of this course is to provide delegates with the necessary skills to implement ISMS that is compliant with the requirements of ISO 17799 and meets the certification requirements of ISO 27001: 2005. The course will provide delegates with a framework for implementation.

Who should attend?

- Those with an interest or responsibility for information security
- IT, Financial and HR Management
- IT Security Officers
- Computer Auditors
- Information security professionals

Prerequisites

Participants should have basic knowledge of ISO 27001

Benefits to Your Business

Both the objective and result of the course will be the construction of effective ISMS under the expert tutelage and guidance of an expert. Take the knowledge and skills imparted during this exercise and use them to improve and protect your business.
